269 Gordon Road — Town of Sweden, NY

This farmstead is the original property that would grow and expand into the collection of farms now known as **Sodoma Farms Inc**., shippers of produce and fruit throughout the United States.

Andrew Sodoma came to the United States from the Ukraine during 1910 as a teenage boy. As a young man he would eventually find his way to Brockport and Gordon Road. Here he and his wife **Anna** raised their three sons **John**, **Edward** and **Robert**. This farm now has grown to over 2000 acres throughout the Town Sweden. It is now owned by Robert's widow **Carol Sodoma** and their sons.

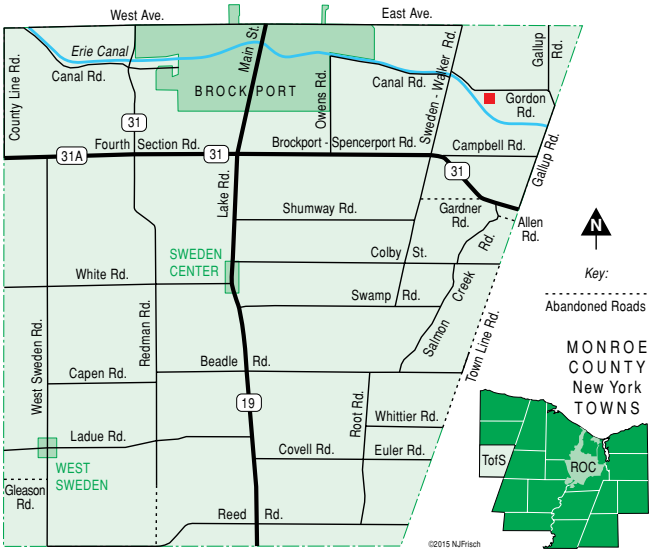

Fig.1 Ramp barn

The property with house and barns was built in the 1860s. Tragically during the winter of 1932, the original barn caught fire. The canal, although close at hand, was frozen and there was no water source to save the building. The barn you see was built in 1935. It is a ramp barn standing on a fieldstone foundation. Features to look at include a galvanized iron ventilator mounted on the roof, the gable transom over the drive door and its remaining metal silo.
